From 3+ years of teaching experience, I can work under pressure that requires adjustment and problem-solving. Besides that, I have excellent emotional control and communication skills in working with others. With a background in mathematics teaching and an interest in logic and algorithms, I am excited to explore new experiences and opportunities to work in the technology field. Being a fast learner and hard-working, I believe that I will be able to do well in this field and create amazing things. Currently, I am looking for a position as a junior software developer.

*One of the best things about life is that we never have to stop learning. There are always new skills to learn and techniques for us to adopt.*

## EXPERIENCE

Anuban Udonthani School | Nov 2020 - Aug 2021
